

Natural sleep for all little kiwis!

Care instruction for Organic wool bassinet Mattress

- Turn the mattress over and rotate it end-to-end twice a week.
- Air your mattress regularly. In winter your mattress requires more frequent airing especially if the room is damp and not well ventilated. Put the mattress in the sun on a warm sunny day is the most effective way to air it. In wet/humid weather, it's ideal if you can run a dehumidifier in the room.
- To clean your mattress lightly sponge the surface and then use a warm iron to dry it. As with any natural mattress, it's best to not allow the fibers inside to become wet. Please, don't remove the cover.

If you need to wash the mattress, please, follow this instruction:

- HAND-WASH IN LUKEWARM WATER 20C
- Use wool Eco detergents
- Do not wring. Roll in towel to squeeze excess water
- Hang in sun or warm cupboard
- Do not tumble dry
- Warm iron

If you use a **Baby monitor**, please, know that it is a piece of plastic, which doesn't breath and will reflect the moisture back into the mattress. It can be a reason for mouldy patch to appear. To avoid it please make a woolen cover for the monitor pad or put it under woolen blanket and under the mattress You will need to air regular those items

If you have any questions about your Natural Mattress care, you are very welcome to contact us. Sleep better naturally... ☺
